Product management: web applications, mobile apps, product requirements, customer interviews, customer development, lean startups.

Technologies: Ruby on Rails, SQL, Mongo, PHP, Objective-C, Cocoa Touch, PHP, git, Linux.

Experience

Project Manager, Wamba, November 2012 — July 2013
Wamba (corp.wamba.com, local brand — Mamba) is a largest dating service in Russia and CIS.

I've managed development of company's own advertising network (Mamba Play) and raised it from ruins to stable product.

After strategic decision of company's management to switch to external advertising sources, I've managed launch of company's own SSP (sell side platform).

Founder, Experimento Labs
My humble experiments in different areas. I am all-in-one — manager, backend developer and mobile app developer. Little, or no profit, but good source of experience.

Some examples of this projects were:
• My Own Rainbow, myownrainbow.com, online fashion jewelry store
• Rocket Deal, subscription based daily deal ecommerce service that utilized iPhone app as a delivery channel
• Ya.Director, first iPhone client for Yandex.Direct (popular PPC ad network in Russia)

Project Manager, Mail.Ru Group and ICQ, August 2011 — November 2012
Mail.Ru Group (http://corp.mail.ru/en) is a largest internet company in Russia.
I've done product and project management, localizations, analytics, mobile and desktop apps.
Worked on largest instant messengers in Russia and CIS: ICQ (www.icq.com) and Agent@Mail.Ru (agent.mail.ru)

I was the first project manager for ICQ in Russia. Managed first releases of mobile ICQ clients for J2ME-phones, Symbian, Symbian Touch, Bada and Windows Phone. Assisted relocation of development of iOS and Android clients from Israel office to Russian office.

Project Manager, Parta Group and Runivermag, August 2008 — July 2011
Parta Group is an investment fund based on a model of private business incubator.

I joined the company as analyst and later was promoted to position of project manager at Runivermag (http://web.archive.org/web/20111121054946/http://www.runivermag.ru/), one of the startups born within Parta Group

At Runivermag, I managed software development project since the company ceased to outsource software development and started in-house development

I was responsible for coordination of activities of Software Engineering department, external (outsourced) designers, Quality Assurance department.

Methodologist, Fia Bank, August 2007 — July 2008
As methodologist, I implemented corporate knowledge management system, reorganized internal business processes of Department of Banking Methodology and formalized interdepartment processes.

Software Engineer, Togliatti Academy of Management, September 2004 — August 2007
During my work at TAoM, I developed multiple business simulators, training systems, information systems. Organized educational courses and workshops.

Education
M.Sc., Information Technology in Economics, Togliatti Academy of Management (2009)
